

FlangeFit®

Hydrant Kit

Description

FlangeFit® Hydrant Kits include everything needed to install most fire hydrants with a 6" flange. Each kit is skin-packed to a durable cardboard backing to make sure that all kit components get to the job site. Eliminates the need to carry a separate inventory of loose nuts, bolts and gaskets reducing inventory items and the labor costs associated with providing this solution.

Installation

Install according to specific manufacturers instructions for flanged equipment.

Specifications

Each kit contains one 1/8"
Each kit contains one 1/8" thick neoprene ring gasket and the following A307 (Grade 2) plated nuts and bolts according to size:

- (6) 5/8" x 3" Plated Break-off bolts*
- (6) 5/8 Plated hexnuts

*Bolts are standard A307 Zinc plated bolts drilled to allow break off at the flange from a side impact.

Fasteners are manufactured to the following standards:

- ANSI/ASME B18.2.1
1981 (bolts)
- ANSI/ASME B18.2.2
1986 (Hexnuts)
