

# Identification Sign

## Decals

### Description

Identification decals are designed to provide identification to the installed sprinkler pipe. This allows the building owner, building maintenance department or any other interested party know which pipes service the fire sprinkler system. This becomes increasingly important as mechanical systems become more sophisticated and become harder to identify as more and more similar piping materials are used in multiple uses.

### Installation

Make sure the surface of the pipe is free from all contaminants such as oil, rust, scale dirt etc. Peel the label away from its' backing material. Position the label on the

cleaned surface so that it is readily visible making sure that the directional arrow points in the direction of the flow of water. Make sure the label is firmly pressed into place.

### Specifications

**Material:**

Paper label with UV protective coating

**Quantity:**

100 labels per roll

**Description:**

Directional Arrow 6 x 2  
Control Valve 6 x 2  
Auxiliary Drain 6 x 2  
Inspectors Test 6 x 2  
Main Drain 6 x 2  
Fire Sprinkler Line 6 x 2  
Do Not Hang 2-1/4 Hydraulic System,  
Foil 5 x 7
